

GOOGLE EARTH ENGINE FOR ENVIRONMENTAL AND CLIMATE DATA ANALYSIS

Ph. D. Aman Bhullar

Aman Bhullar is a researcher who recently earned a PhD from the University of Guelph for developing a novel framework to advance agricultural land suitability assessments across Canada. Currently, Aman is a Post-Doctoral Fellow at Agriculture and Agri-Food Canada, researching how quantum computing can be used for agricultural remote sensing to better monitor our crops from afar. This research is driven by a commitment to food security, specifically focusing on projecting how climate change will impact future yields to better support sustainable agricultural management and adaptive farming practices.
